FAO Statistical Pocketbook Food and Agriculture Organization,2016-11-16 This yearbook presents selected key indicators related to agriculture and food security that the international community, governments, the private sector and civil society can use to assess current trends and prioritize actions. It has two main sections, one thematic and one country-specific. It presents a variety of dimensions of agriculture and food security in four focus areas: the setting; hunger dimensions; food supply; and environment. The book is part of the FAO Statistical Yearbook suite of products; it includes data from FAOSTAT and other FAO databases and international organizations.

OECD-FAO Agricultural Outlook 2021-2030 Food and Agriculture Organization of the United Nations,2021-07-05 The Agricultural Outlook 2021-2030 is a collaborative effort of the Organisation for Economic Co-operation and Development (OECD) and the Food and Agriculture Organization (FAO) of the United Nations. It brings together the commodity, policy and country expertise of both organisations as well as input from collaborating member countries to provide an annual assessment of the prospects for the coming decade of national, regional and global agricultural commodity markets. The publication consists of 11 Chapters; Chapter 1 covers agricultural and food markets; Chapter 2 provides regional outlooks and the remaining chapters are dedicated to individual commodities.

World Development Report 2017 World Bank Group,2017-01-23 Why are carefully designed, sensible policies too often not adopted or implemented? When they are, why do they often fail to generate development outcomes such as security, growth, and equity? And why do some bad policies endure? World Development Report 2017: Governance and the Law addresses these fundamental questions, which are at the heart of development. Policy making and policy implementation do not occur in a vacuum. Rather, they take place in complex political and social settings, in which individuals and groups with unequal power interact within changing rules as they pursue conflicting interests. The process of these interactions is what this Report calls governance, and the space in which these interactions take place, the policy arena. The capacity of actors to commit and their willingness to cooperate and coordinate to achieve socially desirable goals are what matter for

effectiveness. However, who bargains, who is excluded, and what barriers block entry to the policy arena determine the selection and implementation of policies and, consequently, their impact on development outcomes. Exclusion, capture, and clientelism are manifestations of power asymmetries that lead to failures to achieve security, growth, and equity. The distribution of power in society is partly determined by history. Yet, there is room for positive change. This Report reveals that governance can mitigate, even overcome, power asymmetries to bring about more effective policy interventions that achieve sustainable improvements in security, growth, and equity. This happens by shifting the incentives of those with power, reshaping their preferences in favor of good outcomes, and taking into account the interests of previously excluded participants. These changes can come about through bargains among elites and greater citizen engagement, as well as by international actors supporting rules that strengthen coalitions for reform.

OECD-FAO Agricultural Outlook 2016-2025 OECD, Food and Agriculture Organization of the United Nations, 2016-07-04 The OECD-FAO Agricultural Outlook 2016-2025 provides an assessment of prospects for the coming decade of the agricultural commodity markets across 41 countries and 12 regions, including OECD countries and key agricultural producers, such as India, China, Brazil, the Russian Federation and Argentina.

China and the U.S. Thomas Gong Lum, 2009-07 This book compares the People's Republic of China's (PRC) and U.S. projections of global influence, with an emphasis on non-coercive means or soft power, and suggests ways to think about U.S. foreign policy options in light of China's emergence. The global public images of the two countries are compared in this book and PRC and U.S. uses of soft power tools are described, such as public diplomacy, state diplomacy, and foreign assistance. Other forms of soft power such as military diplomacy, global trade and investment, and sovereign wealth funds are also examined. Furthermore, this book analyses PRC and U.S. diplomatic and economic activities in five developing regions -- Southeast Asia, Central Asia, Africa, the Middle East, and Latin America.

World Food and Agriculture - Statistical Yearbook 2021 Food and Agriculture Organization of the United Nations, 2021-10-28 This publication offers a synthesis of the major factors at play in the global food and agricultural landscape. Statistics are presented in four thematic chapters, covering the economic importance of agricultural activities, inputs, outputs and factors of production, their implications for food security and nutrition and their impacts on the environment. The Yearbook is meant to constitute a primary tool for policy makers, researchers and analysts, as well as the general public interested in the past, present and future path of food and agriculture.

The End of Development Andrew Brooks,2017-05-15 Why did some countries grow rich while others remained poor? Human history unfolded differently across the globe. The world is separated in to places of poverty and prosperity. Tracing the long arc of human history from hunter gatherer societies to the early twenty first century in an argument grounded in a deep understanding of geography, Andrew Brooks rejects popular explanations for the divergence of nations. This accessible and illuminating volume shows how the wealth of 'the West' and poverty of 'the rest' stem not from environmental factors or some unique European cultural, social or technological qualities, but from the expansion of colonialism and the rise of America. Brooks puts the case that international inequality was moulded by capitalist development over the last 500 years. After the Second World War, international aid projects failed to close the gap between 'developed' and 'developing' nations and millions remain impoverished. Rather than address the root causes of inequality, overseas development assistance exacerbate the problems of an uneven world by imposing crippling debts and destructive neoliberal policies on poor countries. But this flawed form of development is now coming to an end, as the emerging economies of Asia and Africa begin to assert themselves on the world stage. The End of Development provides a compelling account of how human history unfolded differently in varied regions of the world. Brooks argues that we must now seize the opportunity afforded by today's changing economic geography to transform attitudes towards inequality and to develop radical new approaches to addressing global poverty, as the alternative is to accept that impoverishment is somehow part of the natural order of things.

Global Corruption Report: Sport Transparency International,2016-02-05 Sport is a global phenomenon engaging billions of people and generating annual revenues of more than US\$ 145 billion. Problems in the governance of sports organisations, fixing of matches and staging of major sporting events have spurred action on many fronts. Yet attempts to stop corruption in sport are still at an early stage. The Global Corruption Report (GCR) on sport is the most comprehensive analysis of sports corruption to date. It consists of more than 60 contributions from leading experts in the fields of corruption and sport, from sports organisations, governments, multilateral institutions, sponsors, athletes, supporters, academia and the wider anti-corruption movement. This GCR provides essential analysis for understanding the corruption risks in sport, focusing on sports governance, the business of sport, planning of major events, and match-fixing. It highlights the significant work that has already been done and presents new approaches to strengthening integrity in sport. In addition to measuring transparency and accountability, the GCR gives priority to participation, from sponsors to athletes to supporters an essential to restoring trust in sport.

Barbados International Monetary Fund. Western Hemisphere Dept.,2018-10-04 The key objectives of the program are to restore macroeconomic and debt sustainability, address falling reserves, and increase growth. The new government, which took office in late May, has committed to fiscal consolidation and structural reform as key tools for macroeconomic adjustment.

Securing the Belt and Road Initiative Alessandro Arduino,Xue Gong,2018-02-01 This collection explores the expansion of Chinese outbound investments, aimed to sustain the increased need for natural resources, and how they have amplified the magnitude of a possible international crisis that the People's Republic of China may face in the near future by bringing together the views of a wide range of scholars. President Xi's Belt and Road initiative (BRI), aimed to promote economic development and exchanges with China for over 60 countries, necessitates a wide range of security procedures. While the threats to Chinese enterprises and Chinese workers based on foreign soil are poised to increase, there is an urgent need to develop new guidelines for risk assessment, special insurance and crisis management. While the Chinese State Owned Enterprises are expanding their international reach capabilities, they still do not have the capacity to assure adequate security. In such a climate, this collection will be of profound value to policy makers, those working in the financial sector, and academics.

Review of Maritime Transport 2012 ,2013-02-25 More than 80 per cent of international trade in goods is carried by sea, and an even higher percentage of developing-country trade is carried in ships. This annual publication is an important source of information on this vital sector. It closely monitors developments affecting world seaborne trade, freight rates, ports, surface transport, and logistics services, as well as trends in ship ownership and control and fleet age, tonnage supply, and productivity. The Review contains a chapter on legal and regulatory developments and each year includes a chapter highlighting a different region.

Smart Grid Policy (Us Federal Energy Regulatory Commission Regulation) (Ferc) (2018 Edition) The Law The Law Library,2018-10-15 Smart Grid Policy (US Federal Energy Regulatory Commission Regulation) (FERC) (2018 Edition) The Law Library presents the complete text of the Smart Grid Policy (US Federal Energy Regulatory Commission Regulation) (FERC) (2018 Edition). Updated as of May 29, 2018 This Policy Statement provides guidance regarding the development of a smart grid for the nation's electric transmission system, focusing on the development of key standards to achieve interoperability and functionality of smart grid systems and devices. In response to the need for urgent action on potential challenges to the bulk-power system, in this Policy Statement the Commission provides additional guidance on standards to help to realize a smart grid. The Commission also adopts an Interim Rate Policy for the period until interoperability standards are adopted by the Commission, which will encourage investment in smart grid systems. This book contains: - The complete text of the Smart Grid Policy (US Federal Energy Regulatory Commission Regulation) (FERC) (2018 Edition) - A table of contents with the page number of each section

Financing Infrastructure in Asia and the Pacific Naoyuki Yoshino,Umid Abidhadjaev,Matthias Helble,2017-08-30

Governments throughout the Asia-Pacific region recognize the catalyzing role of infrastructure investment for sustainable growth. Yet, they are faced with the problem of financing new infrastructure. This book provides the latest evidence on the impact of infrastructure investment on economic and social indicators. Presenting several country studies, the book explains how infrastructure investment can increase output, taxes, trade, and firm productivity. Based on this evidence, the book proposes innovative modes of infrastructure financing. Written by leading international experts in economic analysis of infrastructure, the book is an invaluable source for policy makers to better design infrastructure projects.

China's Belt and Road Initiative and Its Impact in Central Asia Marlene Laruelle, 2017-11-10 China's Belt and Road (BRI) Initiative was announced by Chinese President Xi Jinping in September 2013 at Nazarbayev University. It is therefore natural that, for its launch, the NAC-NU Central Asia Studies Program, in partnership with GW's Central Asia Program, seeks to disentangle the puzzle of the BRI Initiative and its impact on Central Asia. Selected from over 130 proposals, the papers brought together here offer a complex and nuanced analysis of China's New Silk Road project: its aims, the challenges facing it, and its reception in Central Asia. Combining methodological and theoretical approaches drawn from disciplines as varied as economics and sociology, and operating at both micro and macro levels, this collection of papers provides the most up-to-date research on China's BRI in Central Asia. It also represents the first step toward the creation of a new research hub at Nazarbayev University, aiming to forge new bonds between junior, mid-career, and senior scholars who hail from different regions of the world and belong to different intellectual traditions.
